**Put air into the lungs and you see a Colored Bar**

Vertical Bars show Ventilation Rate and Ventilation Volume; Horizontal Bar Shows Interval Time

Target Color: Bright Green = everything is correct

Target Volume: Between the two green lines

0.7 L

0.5 L

Vertical Red =
Ventilation rate too slow

Horizontal Red = Interval too long

Vertical Orange = Ventilation rate too fast

Horizontal Orange = Interval too short

Dark green =
Ventilation rate correct but short on volume

Vertical Bright Green =
Correct ventilation rate & volume

Horizontal Bright Green =
Correct interval
