# Track Quality of Results At Different Locations

Gives you the full features of SmartMan Advanced Airway Training as well as the Quality Control Information (QCI) module. It allows you to chart trends, compare groups, look at historical changes, and relate results to survival rates. You can work with this feature from the comfort of your desk and you can export it at anytime.

Results Management

The quality control module allows you to analyse your CPR results whether they are local or at various places. SmartMan's accurate data is stored in the cloud to be examined at a convenient time.

Validate Over Time

Data can be examined live so you can verify it as it is being performed. This allows you to verify that what you want is being performed. It can be collated at a later time.
