

Airway SmartMan

Advanced Life Support Skills Training Detail of Skills Covered

The Ambu Airway SmartMan Training System has an operating trachea and esophagus plus a working chest cavity with lung and comes with a complete torso. It is designed for use with various endotracheal and endo-oesophageal intubation devices. It includes Specific Activities to Practice the following skills:

All SmartMan Training Systems feature **Real Time Feedback** with Easy to Understand Color Bar Graphs.

In both Practice and Test Modes, you can choose to perform Skills with the Visual Feedback turned on or off.

Airway SmartMan can also be used to train for BLS CPR as it provides feedback for Chest Compressions and BLS Ventilations with a BVM.

2 Rescuer Advanced Airway CPR

- ✓ **Compressions Compliance**
 - Depth of Compressions
 - Volume of Compressions
 - Rate/Duration of Compressions
 - Release of Chest
 - Compliance with guidelines for every compression
- ✓ **Ventilations Compliance**
 - Volume of Ventilation
 - Duration of Inspiration (c.p. 0.3 seconds optimal delivery)
