

Real Time Feedback on SmartBaby Guidelines 2010

Pediatric CPR Skills Training Chest Compressions, Ventilations, CPR

SmartBaby is an Intelligent CPR Skills Feedback Training System, designed to rapidly improve the Quality & Performance of Chest Compressions and Ventilations, according to the latest Guidelines.

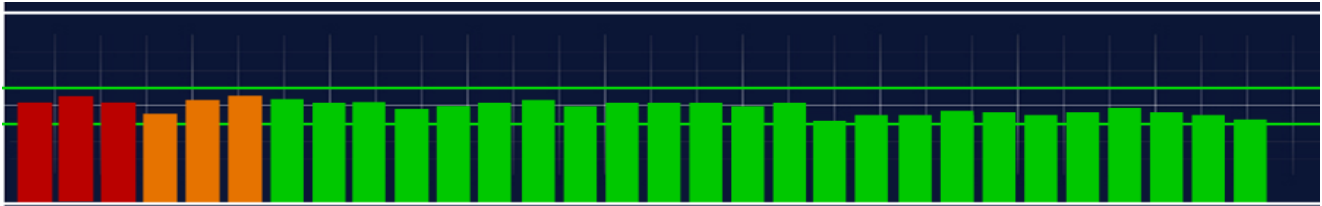

- It is a lifelike manikin that simulates babies up to the age of one year.
- Digital Real Time Feedback.
 - Uses the same SmartMan color bars to help correct performance
 - Ambu Patented Hygienic system

SKILLS

Chest Compressions	Depth is one third to one half of the chest Feedback on Depth, Rate, Full Recoil & timing
Ventilations	Accurate Inspiration Rate, and Volume Tidal view and shows the release of BVM
CPR	1 Person CPR (30:2) 2 person CPR (15:2) Accurate Objective Feedback on all parameters

REAL TIME FEEDBACK helps to improve how you perform pediatric CPR. The SmartMan color bars provide easy to understand visual color feedback so you can quickly adjust skills performance. SmartMan allows you to know you are performing correctly and helps develop muscle memory needed for better skills performance.
